Branch protection rule

Protect your most important branches

[Branch protection rules](#) define whether collaborators can delete or force push to the branch and set requirements for any pushes to the branch, such as passing status checks or a linear commit history.

Your rules won't be enforced on this private repository until you [upgrade this organization to GitHub Team or Enterprise](#).

Branch name pattern *

main

Protect matching branches

☒ Require a pull request before merging

When enabled, all commits must be made to a non-protected branch and submitted via a pull request before they can be merged into a branch that matches this rule.

☒ Require approvals

When enabled, pull requests targeting a matching branch require a number of approvals and no changes requested before they can be merged.

Required number of approvals before merging: 1

☐ Dismiss stale pull request approvals when new commits are pushed

New reviewable commits pushed to a matching branch will dismiss pull request review approvals.

☐ Require review from Code Owners

Require an approved review in pull requests including files with a designated code owner.

☒ Restrict who can dismiss pull request reviews

Specify people, teams, or apps allowed to dismiss pull request reviews.

Search for people, teams, or apps

People, teams, or apps that can dismiss reviews.

Organization and repository administrators

These members can always dismiss.

protect branch conf

https://github.com/Collaborators-frontendLearning-31082022/collabTest/settings/branch_protection_rules/new

☐ **Require review from Code Owners**

Require an approved review in pull requests including files with a designated code owner.

☒ **Restrict who can dismiss pull request reviews**

Specify people, teams, or apps allowed to dismiss pull request reviews.

🔍 Search for people, teams, or apps

People, teams, or apps that can dismiss reviews.

Organization and repository administrators

These members can always dismiss.

frontendLearning-31082022

frontendLearning-31082022

☐ **Allow specified actors to bypass required pull requests**

Specify people, teams, or apps who are allowed to bypass required pull requests.

☐ **Require approval of the most recent reviewable push**

Whether the most recent reviewable push must be approved by someone other than the person who pushed it.

☐ **Require status checks to pass before merging**

Choose which [status checks](#) must pass before branches can be merged into a branch that matches this rule. When enabled, commits must first be pushed to another branch, then merged or pushed directly to a branch that matches this rule after status checks have passed.

☒ **Require conversation resolution before merging**

When enabled, all conversations on code must be resolved before a pull request can be merged into a branch that matches this rule. [Learn more about requiring conversation completion before merging.](#)

☐ **Require signed commits**

Commits pushed to matching branches must have verified signatures.

☒ **Require linear history**

Prevent merge commits from being pushed to matching branches.

☐ **Require deployments to succeed before merging**

Choose which environments must be successfully deployed to before branches can be merged into a branch that matches this rule.

☒ **Lock branch**

Branch is read-only. Users cannot push to the branch.

☐ **Do not allow bypassing the above settings**

The above settings will apply to administrators and custom roles with the "bypass branch protections" permission.

☒ **Require linear history**
Prevent merge commits from being pushed to matching branches.

☐ **Require deployments to succeed before merging**
Choose which environments must be successfully deployed to before branches can be merged into a branch that matches this rule.

☒ **Lock branch**
Branch is read-only. Users cannot push to the branch.

☐ **Do not allow bypassing the above settings**
The above settings will apply to administrators and custom roles with the "bypass branch protections" permission.

☒ **Restrict who can push to matching branches**
Specify people, teams, or apps allowed to push to matching branches. Required status checks will still prevent these people, teams, and apps from merging if the checks fail.

☒ **Restrict pushes that create matching branches**
Only people, teams, or apps allowed to push will be able to create new branches matching this rule.

Q Search for people, teams, or apps

People, teams, or apps with push access

 **Organization administrators, repository administrators, and users with the Maintain role.**
Admins can always push. Users with the Maintain role can push when required status checks pass.

 frontendLearning-31082022
frontendLearning-31082022

×

Rules applied to everyone including administrators

☐ **Allow force pushes**
Permit force pushes for all users with push access.

☐ **Allow deletions**
Allow users with push access to delete matching branches.

Branch protections

☐ **Restrict creations**

Only allow users with bypass permission to create matching refs.

☒ **Restrict updates**

Only allow users with bypass permission to update matching refs.

☒ **Restrict deletions**

Only allow users with bypass permissions to delete matching refs.

☒ **Require linear history**

Prevent merge commits from being pushed to matching refs.

☐ **Require deployments to succeed**

Choose which environments must be successfully deployed to before refs can be pushed into a ref that matches this rule.

☐ **Require signed commits**

Commits pushed to matching refs must have verified signatures.

☒ **Require a pull request before merging**

Require all commits be made to a non-target branch and submitted via a pull request before they can be merged.

Additional settings

Required approvals

0 ▾

The number of approving reviews that are required before a pull request can be merged.

☐ **Dismiss stale pull request approvals when new commits are pushed**

New, reviewable commits pushed will dismiss previous pull request review approvals.

☐ **Require approval of the most recent reviewable push**

Whether the most recent reviewable push must be approved by someone other than the person who pushed it.

☐ **Require conversation resolution before merging**

All conversations on code must be resolved before a pull request can be merged.

☐ **Require status checks to pass**

Choose which status checks must pass before the ref is updated. When enabled, commits must first be pushed to another ref where the checks pass.

☒ **Block force pushes**

protect branch conf

<https://github.com/Collaborators-frontendLearning-31082022/collabTest/settings/rules/new?target=branch&enforcement=disabled>

☐ **Require signed commits**

Commits pushed to matching refs must have verified signatures.

☒ **Require a pull request before merging**

Require all commits be made to a non-target branch and submitted via a pull request before they can be merged.

Additional settings

Required approvals

0

The number of approving reviews that are required before a pull request can be merged.

☐ **Dismiss stale pull request approvals when new commits are pushed**

New, reviewable commits pushed will dismiss previous pull request review approvals.

☐ **Require approval of the most recent reviewable push**

Whether the most recent reviewable push must be approved by someone other than the person who pushed it.
